Summary

Software Engineer with 3+ years of experience in full-stack development, ServiceNow implementation, and cloud-based solutions. M.S. Computer Science candidate (University of Oklahoma, 2026) with hands-on expertise in AI/ML, distributed systems, and DevOps. Eager to contribute to a fast-paced engineering team.

Technical Skills

Languages	Python, Java, JavaScript (ES6+), C++, SQL, HTML/CSS
Frameworks	React, Node.js, Express, Spring Boot, Flask, TensorFlow, PyTorch
Cloud & DevOps	AWS, Azure, GCP, Docker, Kubernetes, CI/CD, Git, Jenkins
Databases	MongoDB, PostgreSQL, MySQL, CosmosDB, Redis
Platforms	ServiceNow (ITSM/ITAM) — Incident, Change & Asset Mgmt; REST APIs; Agile/Scrum
AI / ML	Machine Learning, Deep Learning, NLP, Computer Vision, Data Science

Experience

Technology Consultant | *Trikona • Bangalore, India* Jul 2023 – Jun 2024

- Deployed and customized **ServiceNow ITSM** modules (Incident, Change, Asset Management) using JavaScript, Business Rules, and Client Scripts, reducing manual ticket resolution effort.
- Built features for **Visualizer**, a web platform converting 2D drawings and text into 3D models, accelerating design-to-prototype cycles for toy manufacturing clients.
- Collaborated with cross-functional teams to gather requirements and deliver solutions on schedule using Agile/Scrum methodology.

Technology Consultant | *Firenix Technologies • Pune, India* Mar 2021 – Jun 2023

- Architected and deployed end-to-end **ServiceNow applications** for enterprise clients following ITIL best practices, ensuring smooth IT adoption.
- Developed reusable workflows and API integrations that eliminated repetitive manual processes and improved team productivity.
- Served as primary client liaison, translating business requirements into scalable technical solutions and providing post-go-live support.

Projects

AI-Powered Food Waste Reduction System | *Python • TensorFlow • React • Flask • AWS* 2025

- Trained LSTM/Random Forest forecasting models on sales, weather, and event data — achieved **97.6% demand prediction accuracy** to optimize restaurant inventory planning.
- Built a Computer Vision pipeline (OpenCV + PyTorch) for real-time spoilage detection; surfaced insights via a live React + Flask dashboard deployed on AWS.

ACC Drug Repurposing via TCGA + LINCS L1000 | *Python • R • Bioinformatics • CLUE/LINCS • GO/KEGG* 2025

- Integrated TCGA-ACC RNA-seq data with LINCS L1000 connectivity scores to identify drug candidates that reverse high-risk tumor gene signatures in Adrenocortical Carcinoma (ACC).
- Performed differential expression (edgeR, TMM normalization), GO/KEGG pathway enrichment, and ranked **Top 10 repurposed drug compounds** by reversal strength using CLUE connectivity analysis.

Full-Stack Restaurant Management App | *Node.js • React • MongoDB • AWS S3 • Socket.IO* 2024

- Built MERN-stack app with real-time order tracking (Socket.IO), JWT authentication, AWS S3 storage, and scalable cloud deployment on Render/Vercel.

Education

M.S. Computer Science Jan 2024 – Apr 2026

University of Oklahoma — Norman, OK

Relevant Coursework: Algorithms, AI, Database Systems, Computer Security, Distributed OS, Neural Data Science, Bioinformatics

B.Tech. Computer Science & Engineering Apr 2023

CMR University — Bangalore, India
